

AUMhealth™

Privacy Policy

Last updated: August 16, 2026

PLEASE READ THIS PRIVACY POLICY CAREFULLY BEFORE USING OUR SERVICES OR WEBSITE.

IMPORTANT NOTE — Our Notice of Privacy Practices is a separate document that governs how protected health information ("PHI") about you may be used and disclosed in connection with healthcare services in accordance with the Health Insurance Portability and Accountability Act ("HIPAA").

I. Introduction

This Privacy Policy describes how QH Token, Inc., a Wyoming corporation doing business as AUMhealth™ ("AUMhealth," "QH Token," "we," "us," or "our"), collects and uses personal data about you through AUMhealth.io and through email, text, and other electronic communications between you and AUMhealth. QH Token, Inc. is located at 30 N. Gould St., Suite 4000, Sheridan, Wyoming 82801.

This Privacy Policy describes the types of information we and the independent clinical and pharmacy network that supports the Platform may collect from you, or that you may provide, when you use AUMhealth.io or the AUMhealth Platform (the "Platform").

Use of the Platform is governed by this Privacy Policy and our Terms of Use, and this Privacy Policy is incorporated into those Terms. Capitalized terms used but not defined here have the meaning given to them in the Terms of Use. By accessing or using the Platform, you acknowledge that you've read, understood, and agree to be bound by this Privacy Policy and our Terms of Use. If any part of this Privacy Policy is unacceptable to you, please don't use the Platform or provide us with personal information. We may update this Privacy Policy from time to time, and your continued use of the Platform after we do is treated as acceptance of the update, so please check back periodically.

This Privacy Policy doesn't apply to information collected by third parties, including through any application, content, or advertising that may link to, be embedded in, or be accessible from the Platform. You may be subject to different privacy policies or terms when you use other websites or applications.

II. Information We Collect About You and How We Collect It

We collect several types of information from and about users of the Platform, including:

- Identifiers and contact information — your name, mailing or shipping address, email address, phone number, date of birth, account credentials, and similar information used to identify or communicate with you.
- Health and medical information — height, weight, medical history, symptoms, diagnoses, allergies, medications, treatment history, laboratory information, photographs, treatment goals, and other information relevant to a clinical evaluation, along with any other information exchanged in emails, texts, chats, or calls between you and AUMhealth or our clinical network.
- Transaction and payment information — purchases, subscriptions, refunds, billing status, and payment method. Full payment card data is collected and processed directly by our third-party

payment processor; we receive only limited information such as payment status, card type, or a tokenized identifier.

- Prescription, pharmacy, and fulfillment information — prescription routing, medication orders, refill status, and shipping and delivery details, where applicable to your program.
- Laboratory information — orders, appointment or collection details, test status, and results, where lab testing is part of your program.
- Device, browser, and usage information — IP address, device and browser type, operating system, referring and exit pages, pages viewed, access times, approximate location derived from IP address, and similar technical data collected automatically as you use the Platform.
- Any other information we specifically request from you, including information related to your eligibility for a particular program.

We collect this information directly from you; automatically as you navigate the Platform, including through cookies, pixels, and similar tracking technologies; and from the healthcare professionals, pharmacies, and other third parties who work with us to provide you services.

Cookies and Similar Technologies

The Platform may use cookies, pixels, software development kits, local storage, and similar technologies to operate the Platform, remember your preferences, maintain security, understand usage, and measure performance. Because AUMhealth may handle sensitive health-related information, we configure advertising and analytics technologies with particular care, and we don't intend to authorize third-party advertising technologies to receive protected health information in a manner prohibited by applicable law. If you disable or refuse cookies, some parts of the Platform may not function properly.

Information from Other Sources

We may receive information about you from third parties we work with to provide services to you, such as physicians, other medical professionals, and pharmacies, and we may combine that information with information you give us directly or that we collect automatically.

III. How We Use Your Information

We may use information we collect, including personal information, to:

- Provide, operate, and improve the Platform, and administer your account;
- Facilitate your access to healthcare providers, pharmacies, laboratories, and other services you request;
- Process transactions, subscriptions, orders, fulfillment, and shipping;
- Communicate with you about appointments, your account, orders, treatment workflows, and support, by phone, email, SMS, or in-Platform notification;
- Detect and prevent fraud, and protect the security of the Platform;
- Create de-identified or aggregate information that cannot be used to identify you;
- Measure and improve the effectiveness of our communications, including advertising;
- Design, develop, and communicate with you about new features, products, and services;
- Enforce this Privacy Policy, our Terms of Use, and other agreements; and

- Comply with applicable federal, state, and other laws and regulations.

QH Token does not use the Platform to substitute its own judgment for the independent professional judgment of a licensed healthcare provider. Medical information may be organized, transmitted, or presented through our technology to support clinical workflows, but prescribing, diagnosis, and treatment decisions remain the responsibility of your treating healthcare professional.

IV. SMS Communications

If you opt into SMS text messaging from AUMhealth, you consent to receive messages related to your care — including appointment reminders, medication and refill updates, care coordination messages, and responses to your inquiries — at the mobile number you provide. Message frequency varies, and message and data rates may apply depending on your carrier.

You may opt out of SMS messages at any time by replying STOP to any message you receive from us; you'll get a single confirmation message and no further texts. Reply HELP for assistance, or contact us at help@AUMhealth.io. Consent to receive text messages is never a condition of purchase, and wireless carriers aren't liable for delayed or undelivered messages.

SMS opt-in data is not shared with third parties for marketing or advertising purposes. We may share your number and consent status with service providers who help us deliver messages (such as platform providers, carriers, and SMS vendors) solely for that purpose.

V. Disclosure of Your Information

We may disclose personal information we collect or you provide as follows:

- For treatment, payment, or healthcare operations purposes;
- To anyone authorized under this Privacy Policy or under a separate consent or authorization you provide;
- To healthcare professionals, medical entities, pharmacies, and laboratories that provide services to you, including those who review your information to evaluate or treat you — you acknowledge that when these providers deliver services to you, their personnel may see the information you've provided;
- To service providers that support the maintenance, security, and optimization of the Platform, such as hosting, email delivery, analytics, identity verification, and similar vendors;
- To third-party payment processors, via an encrypted connection, to process your payments;
- To comply with applicable law, legal process, or a governmental request, or where reasonably necessary to protect rights, safety, or security, or to investigate fraud or misuse;
- In connection with a merger, financing, acquisition, reorganization, or sale of assets, subject to applicable law and appropriate safeguards; and
- With respect to de-identified information, for any purpose without restriction.

VI. Your Choices

You can set your browser to refuse some or all cookies, or to alert you when cookies are sent; if you disable cookies, some parts of the Platform may not function properly. You may unsubscribe from

promotional emails using the unsubscribe link in the message. Transactional, account, safety, prescription, and treatment-related communications may still be sent where appropriate even after you unsubscribe from marketing. We do not currently respond to browser "Do Not Track" signals.

VII. Data Security

We use administrative, technical, and physical safeguards designed to protect your information from unauthorized access, use, alteration, or disclosure, including access controls, authentication, encryption where appropriate, and workforce policies. Where we've given you a password to access the Platform, you're responsible for keeping it confidential.

No method of transmission over the internet, and no method of electronic storage, is completely secure. We cannot guarantee the absolute security of information you transmit to the Platform, and any transmission is at your own risk.

VIII. Third-Party Websites and Services

The Platform may link to or integrate with websites and services operated by healthcare providers, pharmacies, laboratories, payment processors, and other third parties. This Privacy Policy doesn't apply to those third-party sites, and their privacy practices may differ from ours. We encourage you to review the privacy notices of any third-party site you visit. AUMhealth doesn't control and isn't responsible for how third parties handle your personal information.

IX. HIPAA and Protected Health Information

QH Token and AUMhealth are not themselves a medical practice or pharmacy. Whether particular information is "protected health information" under HIPAA depends on the entity holding or processing it and the circumstances of that processing. Where QH Token acts as a business associate to a HIPAA covered entity, applicable HIPAA requirements and the relevant business associate agreement govern that processing. A separate Notice of Privacy Practices describes how a healthcare provider or medical entity in our network uses and discloses your protected health information.

X. No Services to Persons Under 18

AUMhealth's prescription and telehealth services are intended for adults age 18 and older unless a particular service expressly states otherwise and is structured to comply with applicable law. We do not knowingly provide these services to minors. If we learn personal information from a child has been collected in circumstances prohibited by applicable law, we'll take appropriate steps to address it.

XI. California Resident Privacy Rights

If you're a California resident, the California Consumer Privacy Act ("CCPA") gives you additional rights regarding your personal information. The CCPA doesn't apply to PHI governed by HIPAA or medical information governed by the California Confidentiality of Medical Information Act; that information remains governed by this Privacy Policy and our Notice of Privacy Practices.

For personal information the CCPA does cover, you have the right to know what we've collected, used, and disclosed about you in the preceding twelve months; the right to request deletion, subject to

applicable exceptions; the right to opt out of the sale of your personal information; and the right not to be discriminated against for exercising these rights.

To submit a Right to Know or Right to Deletion request, email help@AUMhealth.io. We'll need to verify your identity before processing your request, which may include confirming your name, email, and phone number, and in some cases a declaration under penalty of perjury. You may also designate an authorized agent to submit a request on your behalf, subject to proof of that authorization.

XII. Other U.S. State Privacy Rights and Consumer Health Data

Residents of certain other U.S. states may have rights under applicable comprehensive privacy laws, which can include the right to know or access personal data, correct inaccuracies, delete certain data, obtain a portable copy, and opt out of certain sales, targeted advertising, or profiling, depending on the law and whether it applies to QH Token.

Some states separately regulate "consumer health data" outside of HIPAA, which may provide additional rights concerning the collection, sharing, and deletion of health-related information regardless of whether it qualifies as PHI. Where required, we'll provide additional state-specific notices or consent mechanisms. We'll respond to qualifying requests in accordance with applicable law and may need to verify your identity first.

XIII. Revisions to This Privacy Policy

We may change this Privacy Policy at any time. Any changes will be posted on this page, and the "Last Updated" date above identifies the current version. You're responsible for periodically reviewing this Privacy Policy; your continued use of the Platform after a change is posted is treated as your acknowledgment of that change.

XIV. Contact Information

If you have questions or comments about this Privacy Policy or our privacy practices, please message us through the Platform or contact us at:

AUMhealth™

QH Token, Inc.

30 N. Gould St., Suite 4000

Sheridan, Wyoming 82801

Email: help@AUMhealth.io

Website: AUMhealth.io

When submitting a privacy request, please provide enough information for us to reasonably identify and, where required, verify your request. Please don't send highly sensitive medical information by ordinary email unless we've specifically directed you to do so through a secure channel.
